Intronis
MSP Solutions by Barracuda
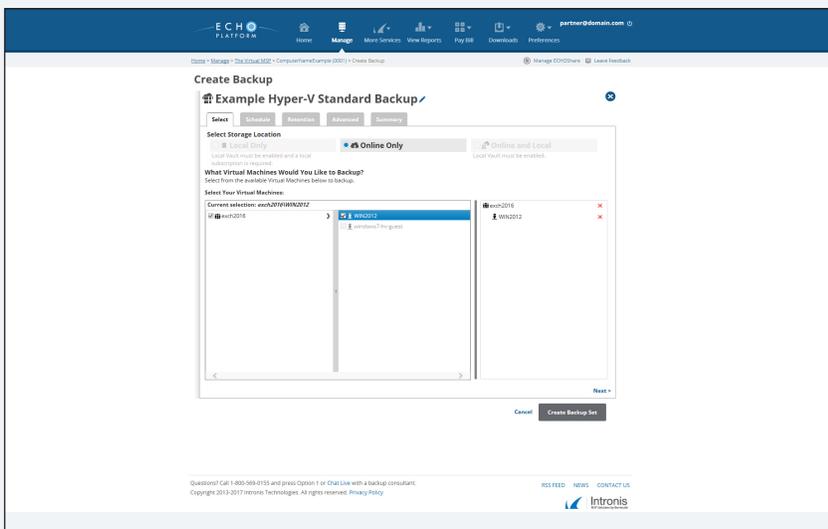

Windows Server Hyper-V™

Protect Hyper-V based virtual environments

SMB adoption of server virtualization continues apace, as business owners seek to shrink IT footprints and operating costs. Yet anxieties persist about virtualization's hidden costs and risks. Fortunately, MSPs can partner with Intronis to help manage P2V migration and keep their clients' businesses running.

Intronis offers a native Hyper-V backup solution that allows you to protect virtual machines from the same web-based platform you use to back up all the rest of your data. Intronis' support of Microsoft APIs allows MSPs to easily back up multiple virtual machines across multiple servers to the cloud, local storage media, or both. Intronis Rapid Recovery for Hyper-V, a disaster recovery tool that allows virtual machine recoveries in minutes, lets MSPs help clients maximize system uptime.

Complete Protection for Virtual Machines

Centralize your BCDR
Partners can manage Hyper-V virtual machines right from the Intronis Partner Portal, our convenient central management console. With a single platform, IT solutions providers can create backup sets for a wide variety of data types, including Hyper-V virtual machines.

Expand your virtual services footprint
Virtual infrastructures are becoming the norm for organizations worldwide, and IT services providers need to deliver an effective solution to protect these systems and quickly recover them in case files are deleted, corrupted, or otherwise compromised.

Intronis offers native data backup for both Hyper-V and VMware from a single platform. That makes Intronis a cost-effective solution for partners who want to grow their data protection capabilities without spending extra time or money running a separate virtual backup solution.

Backing Up Hyper-V

Secure Protection for Multiple VMs
Provide complete protection for all of your clients' virtualized data. Back up any number of Hyper-V virtual machines on a single hypervisor through the Intronis agent installed on that host. We support Hyper-V on Windows Server 2008 R2, Windows Server 2012 and Windows Server 2012 R2.

Local and Cloud Backup
Cover all of your bases by storing Hyper-V backups locally, in the cloud, or both. Cloud backups are stored encrypted for maximum security.

Fast Hyper-V VM recovery
Keep your clients up and running with Hyper-V Rapid Recovery, a feature that lets you back up full Hyper-V VMs to local storage, and restore them in minutes.

Unlimited Historical Versions
Enjoy efficient long-term backup with the same granularity as other data types. Intronis enables you to store unlimited historical versions of your clients' virtual machines.

Intronis
MSP Solutions by Barracuda

Flexible Recovery Options

With a few clicks, you can recover any number of Hyper-V virtual machines protected in the Intronis cloud or your local storage environment. Each recovered Hyper-V virtual machine includes all virtual hard disk and VM configuration files restored to its own VM folder, allowing you to recover your virtual data the way you want.

- **Import to Hyper-V**—Select the desired VM folder and import directly to Hyper-V
- **Object-level restore**—Explore and extract specific files quickly, with no need to mount VHDs
- **Fast RTO** — Recover Hyper-V virtual machines from local storage in minutes

The Intronis Advantage

Centralized Management

- Web-based backup and recovery
- Android/iPhone mobile compatible
- Real-time failure/warning alerts
- Initiate restores remotely

Unbeatable Security

- 256-bit AES and SSL security encryption to and from the cloud
- Redundant, bi-coastal data centers

Network and Storage Optimization

- Intelliblox block-level technology
- Bandwidth throttling
- Large file support

Consolidated Operations

- Pre-integrated with major RMMs and PSAs

About Intronis MSP Solutions by Barracuda

Intronis MSP Solutions by Barracuda is the first single-source vendor to combine security and backup solutions tailored specifically for managed service providers. Intronis enables MSPs to centrally deploy and manage a broad portfolio of services, protecting business-critical files, folders, email, applications, servers and networks — both locally and in the cloud — through a single-pane-of-glass management console. MSPs benefit from core PSA and RMM integrations, as well as a true partnership with Intronis, through fixed pricing plans and partner enablement tools that help MSPs accelerate growth and increase profits.
